

**DR. WACK**

Made in Germany

# Product-Information

## The Problem:

### Dirty Motorcycle and water stains without using a chamois

While regular and careful cleaning of motorbikes is a key prerequisite for preserving its value, it requires significant time and effort. Especially wiping with a chamois is a time-consuming and hard work. The result of a survey with bikers shows, that besides perfect cleaning and material compability self-drying with water stains is one of the most important criteria for buying motorcycle cleaners. This attribute is currently not available on the market.

## The Solution:

# TOTAL CLEANER<sup>+</sup>

**NEW FORMULA**

**NO Wiping Dry  
NO Water Spots**

## Product Advantages:

### Clean without having to use a chamois!

- Dries without the need for a chamois and without leaving water stains
- Proven strong S100 cleaning power: Effortless and residue-free removal of dirt – even insect remains and grease and oil stains can be removed easily
- Material protection for all standard motorcycle surfaces
- Gel formula provides exceptional yield and cleaning action
- Contains no acid

## Applications:

### For complete motorcycle and all motorized bikes, also matt varnish

## How to apply:

Spray the entire motorcycle with S100 Total Cleaner+. Allow the gel formula to act from between 5 and 30 minutes depending on the degree of soiling. If necessary, use a sponge. Then thoroughly hose down the motorcycle with a strong jet of water and allow to dry naturally or wipe with a chamois.

The motorcycle dries by itself without having to use a chamois and without leaving water stains. Dry horizontal areas where the water cannot drain off.

**Note:** Do NOT use on unlacquered aluminium or black chromated components (e.g. metal radiator hose). Do not use in hot sun or on heated surfaces.

## Tip:

For best results, spray the cleaner on the dry and cooled motorcycle. Also ideal for matte paint and foils (glossy and matte). To protect the bike against weathering, finish off by using the S100 Gloss-Wax Spray or the S100 Matt-Wax Spray on the paint after cleaning.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
